

Kansas Advocates for Better Care

Recruiting Membership

Kansas Advocates for Better Care (KABC) is working to create higher functioning board committees. We've created goals and job descriptions for our board committees and its members. We only have two paid staff, so we can either raise money to hire more staff to create a greater impact, or we can involve volunteers at a higher level. We are starting with the latter. We are recruiting membership for the committees from board members and from other volunteers to broaden our base, and to create a pool for recruiting future board members.
